Test sheet: each mark’s height within its style’s mark zone, now and proposed

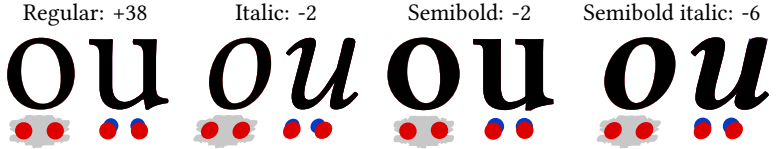

For each mark, its four styles side by side, “now” (the patched fonts) and “proposed” (the mark-anchor changes proposed on 2026-11-12, not applied). Grey: every above (or below) mark of the style placed on o by its anchors (the mark zone; on O for the capital forms, which the shaper substitutes after a capital). Red: the mark itself. To the right of each, blue: the designer’s precomposed letter, overlaid by the composed one in red, where there is one. Number: the gap between the mark’s anchor and its ink edge facing the base, minus the median gap of the style’s marks (of the style’s capital forms, for a capital form); positive: further from the base. The marks are those whose number differs by 8 units or more across the styles, and those with a proposed change; most inconsistent first, one per page. Under each, the mark on every Latin and IPA base letter (capitals only, for a capital form) in the proposed fonts, one block per style; where the letter has a precomposed form, it is shown instead, in blue.

Proposed: dot below and diaeresis below at +28 in every style; dot above at +30 in every style; semibold diaeresis and `dieresis.cap` up 9; semibold italic ring up 16; semibold breve below down 6.
