Test sheet: the stem-axis rule, declared slant or the stem's own angle

Italic and semibold italic. Green: the patched fonts now. Blue: the rule at the declared slant (12°, 11.5°), carried from the end of the stem's straight part. Red: the rule at the stem's own angle (the stem's midline extended). Grey: the precomposed letter. The two rules differ by (stem angle − declared) × the height from the end of the straight part to the anchor: a few units for x-height letters, up to about 20 for capitals and l. The columns show each variant alone; in the overlays red is drawn last, so where only red shows the variants coincide. For ı j l above, green is the rule at the declared slant (the patched fonts), so green and blue coincide.

Italic: *ɪ* U+0131 stem 12.9°; above X now 277, declared 277 (+0), own 282 (+5)
