Test sheet: above marks on a–z and IPA letters, precomposed and anchored

Blue: the designer's precomposed letter, which is not changed. Black: base + mark, placed by the anchors. For each style and mark, "now" is the patched font; "trial" (only where the mark moves) is the patched font with the proposed mark anchor moves: the symmetric-mark rule ($k = K$ where $|k - K| \geq 10$) and the vertical moves supported by Δy (median, x-height bases, $|\Delta y| \geq 10$, the bases agreeing). A move is better where the black letters sit more like the blue ones.
