Test sheet: drafts of the letters missing in the non-regular styles

To-do item: “Create the glyphs that are missing in the non-regular styles because the base groups now reach further than the designer’s coverage (Ɇ R Ɏ ɏ ƥ ҽ Ɱ ʊ ɣ exist only in regular, Ɉ f ſ not in every style, and Ɋ Ⱡ Ⱨ before them), as stage 2 already does for a few.” BASE_IPA has no gaps; these 15 letters of BASE_LATIN are all.

Drafts are in blue; black is the designer’s glyph. The drafts are in `fonts/*-draft.otf` (the patched fonts plus the drafts; no anchors), written by `run_missing_glyphs_sheet.py`; the recipes are in `missing_glyphs.py`. Each letter is drafted from the style’s own letters where the regular glyph shows how the designer built it:

Method (rebuilt 2026-11-13) Every draft is built from components, as a font source builds a glyph: the base letter’s own contours, plus a part that is a glyph of the font or one simple contour, or a splice of two contours. No boolean operations: the drafts keep the components’ own points and *overlap* where the components overlap (FontForge shows them unmerged; font generation merges them). In regular the designer built most of these letters the same way: Ɇ = E + U+0338 (0.2 % mismatch), R = R + U+0335, ſ = ſ + U+0335, Ɉ = J + U+0336, …

overlay R Ɏ ɏ ſ ҽ ⱶ: the base and the style’s own stroke overlay mark (U+0335 or U+0336), scaled to the bar’s length and the style’s bar thickness (own Đ, Ł or đ), placed as the mark fits in the designer’s glyph: its height, and its offset from the stem (or the de-slanted centre).

reference Ɇ: E and the long solidus U+0338 (redrawn in semibold and semibold italic, where it was the short one), crossing half E’s height 23 left of E’s de-slanted centre. Ⱡ: I, L and a bar contour. Ⱨ Ɐ Ʌ: turned references.

part f ƥ: the base and the stroke of regular’s glyph as one contour (f’s a rectangle, ƥ’s with its swelling ends), slanted and thickened to the style.

splice Ɱ (M and J’s hook), ʊ (u and ɪ’s fishhook), ɣ (y and regular’s ɣ loop), ɋ (q’s own descender and ʇ’s hook, regular ʇ’s, at the descender), Ɉ (italic J, its own crossbar spliced out, + U+0336), Ɋ (regular’s Ɋ, its bowl spliced from the style’s O, its tail lengthened by splicing it with itself moved down): the outlines are cut where they cross a line and joined there; points left on a straight edge are dropped.

Each cell shows the base letter, the letter, and a letter of the same style with the analogous part. Comparison rows: Gentium Plus, Noto Serif and Junicode (the medievalist font, for f ſ ƥ ɣ Ⱡ ⱶ Ⱨ); Langscitinus is left out because it has exactly Libertinus’s gaps. A dash: the font lacks the letter.

All drafts in context

Each letter after its base letter; the last four are outside the base groups. The letters follow by decision: approved, approved but changed since, then the general sections (control points of the grafts, recipe checks, turned letters), and the pending and rejected letters last.

Control points of the grafts

The drafts as compiled into `fonts/*-draft.otf` (what FontForge shows on opening them): on-curve points black, off-curve points as open circles on their handles; the dashed line is the joining height (on the designer's regular glyph, where the recipe joins when it is run in regular). The outlines are the result of a boolean union and cut (skia-pathops); at the join, points left on a straight stem are dropped, so a stem runs straight from the base letter's line into the donor's, as in regular Ɱ.

Recipe checks in regular

The recipes that take a part from another letter, run in regular and compared with the designer's glyph (in the regular draft font at U+F600 and up). Mismatch: the ink of designer XOR recipe, at the same origin, over the designer's ink; a shift of the whole letter counts double on a thin letter (once where ink is missing, once where it is extra), so the mismatch after the best horizontal shift is given too.

	designer	recipe	mismatch	best shift	advances	
Ɇ			1.5 %	1.5 % at +0	557 / 557	regular's E + regular's U+0338 (long solidus overlay), crossing half E's height 23 left of E's de-slanted centre, as in regular Ɇ

Depths of q, the hook tails, Q and J

Lowest point of each letter (units per 1000). Libertinus: the original fonts, then the drafts (the designer's glyph where there is one), then the revision of q Q with the tail to g's depth. The Libertinus descender line is −232; g reaches −238. Junicode has neither q nor Q.

Pending

Tentative, or redrafted after a comment.

Ɇ U+0246 Latin Capital Letter E With Stroke (reference)

E + the long solidus U+0338 (as regular's Ɇ); middle anchor moved right in the italics

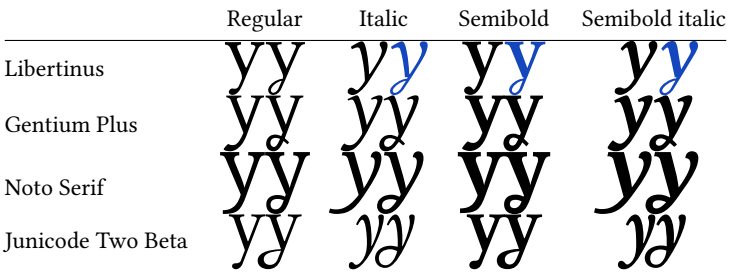

rectangle: the solidus's centreline and thickness, square ends

parallelogram: the same, level ends (as Ⱥ's stroke)

Italic: [reference] italic's E + italic's U+0338 (long solidus overlay), crossing half E's height 23 left of E's de-slanted centre, as in regular Ɇ; advance 526.
Semibold: [reference] semibold's E + U+0338 redrawn from regular's (long solidus overlay), crossing half E's height 23 left of E's de-slanted centre, as in regular Ɇ; advance 562.
Semibold italic: [reference] semibold_italic's E + U+0338 redrawn from italic's (long solidus overlay), crossing half E's height 23 left of E's de-slanted centre, as in regular Ɇ; advance 538.

ỿ U+1EFF Latin Small Letter Y With Loop (splice)

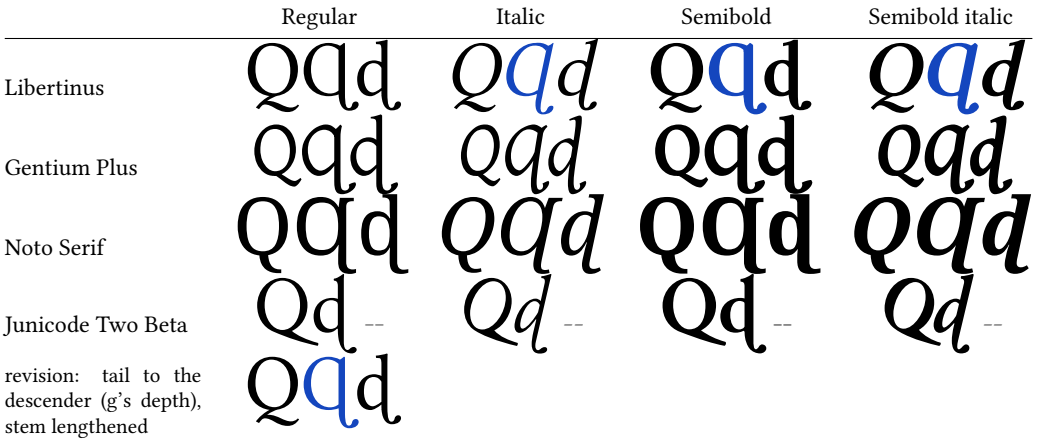

rebuilt 2026-11-13 from components (references, overlapping contours, splices): y and regular's ỿ spliced

Italic: [splice] italic's y spliced at y -10 with regular's y below, slanted to y's right edge (dx/dy 0.657 vs 0.443), loop × 1.11 (right arm); advance 503.
Semibold: [splice] semibold's y spliced at y -10 with regular's y below, slanted to y's right edge (dx/dy 0.403 vs 0.443), loop × 1.11 (right arm); advance 533.
Semibold italic: [splice] semibold_italic's y spliced at y -10 with regular's y below, slanted to y's right edge (dx/dy 0.608 vs 0.443), loop × 1.32 (right arm); advance 510.

Ɋ U+024A Latin Capital Letter Small Q With Hook Tail (splice)

rebuilt 2026-11-13 from components (references, overlapping contours, splices): regular's Ɋ, bowl spliced from O, tail lengthened (stem only)

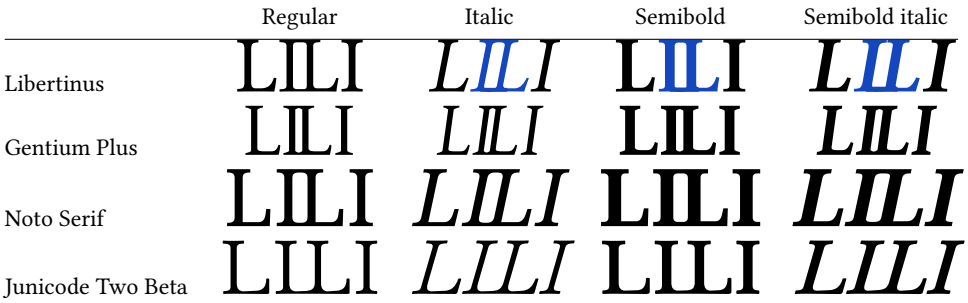

revision: tail to the descender (g's depth), stem lengthened

Italic: [splice] regular's Ɋ slanted (tan 0.213), pushed outward by -4.0 (stem I 77 vs 85); bowl spliced from own O (arc dipped into the notch); tail lengthened by 49 below y -14 (stem only); advance 668.
Semibold: [splice] regular's Ɋ, pushed outward by 18.5 (stem I 122 vs 85); bowl spliced from own O (arc dipped into the notch); tail lengthened by 33 below y -14 (stem only); advance 705.
Semibold italic: [splice] regular's Ɋ slanted (tan 0.203), pushed outward by 19.0 (stem I 123 vs 85); bowl spliced from own O (arc dipped into the notch); tail lengthened by 33 below y -14 (stem only); advance 706.
Regular, revision: [revision] regular's Ɋ; tail lengthened by 46 below y -14 (stem only); advance 668.

Ⱡ U+1EFA Latin Capital Letter Middle-Welsh Ll (reference)

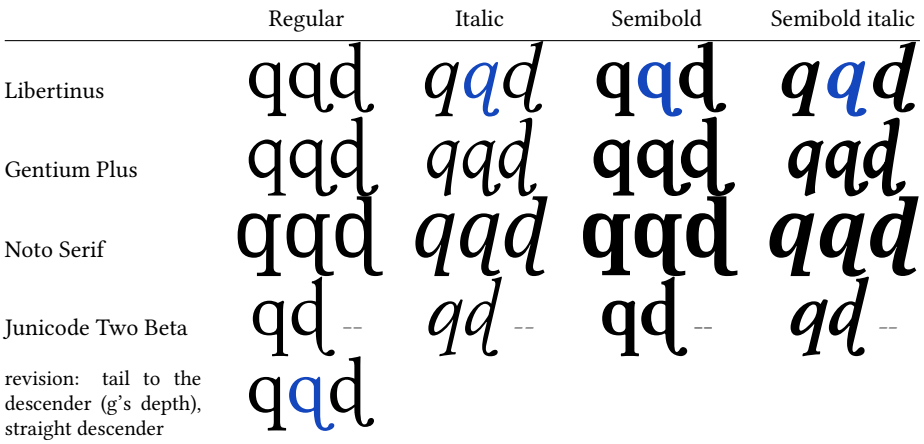

rejected 2026-11-13; rebuilt 2026-11-13 from components (references, overlapping contours, splices): I, L and a bar contour

Italic: [reference] italic's I + L at +236 (regular's at +250, × I's advance), and a bar 45 thick (L's foot) from stem to stem along the baseline: three overlapping contours; advance 757.
Semibold: [reference] semibold's I + L at +269 (regular's at +250, × I's advance), and a bar 49 thick (L's foot) from stem to stem along the baseline: three overlapping contours; advance 809.
Semibold italic: [reference] semibold_italic's I + L at +289 (regular's at +250, × I's advance), and a bar 59 thick (L's foot) from stem to stem along the baseline: three overlapping contours; advance 866.

q U+024B Latin Small Letter Q With Hook Tail (splice) (outside the base groups)

rebuilt 2026-11-13 from components (references, overlapping contours, splices): q's own descender spliced with a hook at the descender

Italic: [splice] italic's q spliced at y -18 (its own straight descender) with ʈ's hook moved down 12 to g's depth (-238), stem × 0.97; advance 499.
Semibold: [splice] semibold's q spliced at y -17 (its own straight descender) with ʈ's hook moved down 15 to g's depth (-238), stem × 0.94; advance 526.
Semibold italic: [splice] semibold_italic's q spliced at y -17 (its own straight descender) with ʈ's hook moved down 15 to g's depth (-238), stem × 1.00; advance 580.
Regular, revision: [revision] regular's q spliced at y -2 (its own straight descender) with ɽ's hook moved down 6 to g's depth (-238), stem × 1.06; advance 511.
