

Upsilon and grave

Original, then patched, versions of upsilon and combining grave, after setting upsilon's above-anchor.

ϵ ϵ̃ ϵ̄

ϵ̂ ϵ̃̂ ϵ̄̂

New upsilon above-anchor: regular (253, 645); italic (358, 645); semibold (267, 645); semibold italic (369, 645)

Revised combining grave above-anchor: semibold italic (0, 683). Moved from (−142, 683), which is far left of the optical center of the mark, which has the effect of attaching the mark too far right.

Spoof to move modifier grave (which has the exact same outline as combining grave) to an anchored position, if upsilon had an above-anchor at (358, 645) (keeping combining grave's above-anchor as is). Note upsilon is U+028A and modifier grave is U+02CB.
